

The following text was included as part of a brochure promoting the services of an interior design/homewares business with a special angle on their design services....

###

Save money and time by avoiding costly decorating mistakes....

**If you're renovating, building or redecorating, before you call an Interior Designer or Colour Consultant, you need to call us - the Atmospheric Design Specialists.**

**You Need a Personal Atmospheric Design Profile:**

Yes it's about your home.... but it's also a revealing, eye-opening session that will reveal things about your inner self.

Don't just find out what an interior designer or colour consultant think you should do, find out what you actually **need** to give your home that special vibe. You know, that indefinable quality everybody notices as soon as they step through the door.

We all have an innate sense of what it is we must have around us to 'create the home where we belong'. We just don't know how to tap into that inner realm to discover how and why we should design and decorate our home a certain way.

You may follow a designer's ideas, and stick to a colour consultant's wise advice, and yet wonder why your house is still not a home.

**You** intuitively know what you need to feel completely at home, and we know how to squeeze it out of you.

We'll help you find the colours, textures, lighting, scents, sounds, patterns, objects and materials you should have in your home - and we'll have fun along the way.

To discover what you need inside your home, we need to look 'inside' you. We don't just want you to live in your home, we want you to **connect** with it!

Home is your corner of the world - so let's 'Create the home where you belong' - **today**.

Group seminars or single consultations available on request.
