

The following text was created to be placed on flyers promoting pure beeswax candles. Graphics and advanced layout of flyers are the responsibility of the client.

IMPORTANT... Don't pollute your home unknowingly!!

95% of candles sold in the world today contain paraffin wax, a toxic by-product of the petrochemical industry. Only candles such as 100% pure beeswax or soy candles emit no toxic fumes when burning.

Our candles are 100% Pure Beeswax:

- No harmful paraffin wax or petrochemicals.
- Completely non toxic and safe to breathe.
- Cotton wicks.
- Natural subtle honey scent.
- Beautiful, radiant, golden flame produced by no other candle.
- Natural room deodoriser.
- No black soot or smoke when burning.
- Burn for twice as long as most normal candles.

Visit today and experience beautiful beeswax candles first hand.
