Give your child the best chance possible to develop vital water skills and have fun in the water all year long:

Young children from 1 to 3 years of age get great usage from their adjustable Bubbaducks Splashsuit. The pool, the beach... any place is a great place to swim all year long with a warmth giving Splashsuit.

Size 1 and 2 splashsuits are made from 3mm thick neoprene (the same material as adult wetsuits), and are designed to keep your child warm in the water by holding an insulating layer of water next to the skin.

- Sturdy velcro fastening - no nasty zips to bite skin
- Fully adjustable to expand as your child grows
- Splashsuit has legs because your child can spend longer in the water without tiring at this age, and extra warmth is required
- Vest style arms for unrestricted movement - no chaffing or pinching
- Bright, bold colours make your child easy to keep an eye on - you can spot them at a glance
- Go swimming all year 'round - no need to wait for a hot day!
- So strong and long lasting you can use again and again for any future family additions - only one outlay required

Important:

If you're wisely spending money on swimming lessons and water familiarisation for your young child, don't watch your money go down the drain....

Young children suffering from cold in the water will not enjoy the experience or remember what they've been shown, they'll be too busy shivering and wanting OUT.

In fact, instead of developing a love for water, they'll simply learn to loathe it.

Even heated pools are often still too cold for very young children.

A Splashsuit will guarantee they have the best chance possible of staying comfortable in the water for long enough to reap the benefits of swim school sessions.

Designer swimming outfits look cute but can be costly, and they don't perform any function apart from looking good. Splashsuits look good AND they perform a function vital to creating optimal learning conditions for your child.

The BIG Bonus:

Wearing a Splashsuit means your child can swim all year 'round.

Anywhere.

Any time.

No more waiting for Summer before getting in the pool and having fun.

Plus, if they *are* having swimming lessons, you no longer need to be afraid they'll forget what they've learned before swimming season comes around again.

Your child can keep their swimming and water skills constantly up-to-date because they'll never again have to wait for a hot day before going swimming in any pool.

You never know, you could have the next Ian Thorpe on your hands!

And remember:

At this age your child's suit will fit for an entire year or more, and give 100hrs of hours of swimming pleasure.

Any future family additions can benefit too. This is one long lasting hand-me-down truly worth saving.

What would you pay to ensure your child and future children have the best chance possible of developing life saving water skills?

.....Peace of mind is priceless.

It's easy to get your Bubbaducks Splashsuit on and off your child:

1. Child steps into Splashsuit just like a pair of shorts.
2. Fasten velcro across the middle as snugly as possible.
3. Bring flaps over shoulders and fasten to velcro on back.
4. Straps fasten on the back in this style of Splashsuit so your child will find it difficult to take the Splashsuit off when you want it kept on!
5. To remove simply whip off top half of Splashsuit, then let child step out . (No more clingy bathers - Splashsuits come off in seconds!)
