## **Finally available to parents throughout Australia and the world... Bubbaducks Splashsuits - The cool way to keep warm in the water**

Thanks to an Australian mum who brought the idea with her when she moved from England, Bubbaducks Splashsuits for babies and young children are now readily available in Australia as well as worldwide.

Bubbaducks Splashsuits are wetsuits made to insulate babies and young children from the cold when swimming in the pool or sea.

Wetsuits for young children are a very important development in the area of helping children to learn water skills... plus they allow them to feel comfortable, happy, and warm in the water all year 'round.

### **Bubbaducks Splashsuits are:**

- ideal for use in swimming pools or the sea... every place is now a great place for baby to swim without getting cold...no need to travel to a heated pool, and no need to consider the weather ever again
- designed specifically for babies and young children so they trap warmth precisely like a wetsuit should - no more shivers or sad faces
- fully adjustable to fit your growing child
- kind to your baby's skin because they are soft, comfortable, and made to fit snugly yet gently
- made to move without chaffing so that legs and arms can do whatever they want without restriction - no redness, pinching, or itching
- super fast to get on and off - no waterlogged bathers or clingy outfits to peel off and wring out
- vibrant and eye-catching - this is one piece of swimwear that draws attention for all the right reasons... but best of all it's so easy to keep an eye on your child when they're in such bright, bold colours
- easy to grip so you can hold onto baby safely yet softly
- so long lasting you can use them for any further additions to the family - the most useful and worthwhile hand-me-down ever
- the best way to guarantee your child doesn't suffer from 'cold water misery'

because the water temperature will seem so warm and consistent they'll be too busy having fun

You can buy your Bubbaducks Splashsuit online today, and your baby or young child will be swimming in constant comfort in little more than a week.

[Yes, I'd like my baby to be warm and happy in the water no matter where we swim, and no matter what time of year.](#)
